

Decatur Indoor Sports Center - Crosswalk - Decatur, IL

Services:

Decorative Pavement

Decorative Pavement on Asphalt

StreetPrint®, a decorative asphalt pavement technique, offers residential customers the opportunity to bring their personal style to the outside of their home and gives commercial and government agencies a way to make public areas more visually appealing.

StreetPrint® is a fashionable option for driveways, walkways, parking lots, bicycle lanes, building entrances, medians, and crosswalks or in any area to define and beautify.

Dunn is the only licensed contractor in central Illinois for this cost-effective process, which can be done for a fraction of the cost of using brick pavers.

From simply adding an imprinted border to a driveway to creating an elaborate pattern for a garden path, Dunn will work with each customer to choose just the right pattern and color for a project.

Suitable for new construction, renovation, or upgrading, StreetPrint® offers 52 colors in almost any design.

Residential Driveway - Decatur, IL

Decorative Pavement on Concrete

Why not use your sidewalk, driveway or other concrete surface as a design element? Let Dunn Company help you create a unique accent to your home or business with stamped or colorized concrete.

Choose from Cobblestone, Random Stone, Brick or Slate patterns for the entire surface, a border accent or a custom design. The pre-blended concrete is available in 48 colors. For a more dramatic look, choose a coordinating color for the release agent for added depth and contrast.

As a finishing touch, we'll put on two coats of high gloss concrete sealant. Although the surface will need to be resealed periodically, the maintenance costs are less than using hand-laid cobblestone, slate or brick.

Exposed Aggregate Concrete

For a decorative option on a concrete surface, you can choose exposed aggregate.

This technique, which uses one of two sizes of pea gravel instead of limestone in the concrete, is a great choice almost anywhere regular concrete would be used. We'll top it off with a high-gloss sealant for a wet-look appearance and added durability.
